

# St. Boniface Hospital New ED Project

## Construction Newsletter

SEPTEMBER 1, 2022

ISSUE 05

This monthly newsletter provides insight into construction activities and updates on the progress of the new Emergency Department project.

### This month at a glance

August saw a portion of the south parking lot paved in asphalt and turned over. The new architectural feature retaining walls were formed and poured in the south parking lot. Site utilities continued with installation of new services and ground floor columns for the new Emergency Department were started.

### Upcoming Work

- Completion of site utilities
- South entry foundations
- Site demolition and grading in the south parking lot will continue.
- Ground floor columns to be poured
- Foundation walls to continue

### Fun Facts

There is approximately 60 feet of new waste water and sewer concrete pipe being installed at the existing south entrance to the hospital. This service is being installed at an average depth of 25 feet from the existing ground elevation. A total of 2,500 cubic meters of material was removed to install this new service.
